Name _____

Investigate Log

Independent Inquiry

When you observe, you use your senses to find out about things.

Materials

Here are some materials you might use. Draw other materials you may need.

balloon

1. Take a breath. Let it out by blowing into a balloon. Then pinch the end of the balloon so no air gets out.
2. Observe the balloon. How did it change?

Possible answer: It blew up and got round. It is full of air.

3. Repeat a few times. Observe how much air you breathe out each time. Are all your breaths the same? Tell how you know.

Possible answer: The balloon gets big when I take a big breath. When I take a small breath, the balloon is small.
