Measuring Weather

When you see a new word, look for parts you know. For example:

What is a **windsock**?
You know that wind is moving air.
So a **windsock** might have to do with moving air.

Use word parts to help you figure out the new words below.

1. A meter is a tool that measures.
A **thermometer** measures temperature.
Circle words for other measuring tools.

condense	**anemometer**	**speedometer**	**meeting**

2. Vapor is a kind of matter in the air.
Water vapor is water in the air. Circle other words that tell about matter in the air.

evaporate	**weather**	**varnish**	**vaporize**
