Name _____

Investigate Log

Independent Inquiry

To infer, observe carefully and draw a conclusion.

Materials

Here are some materials you might use. Draw other materials you may need.

ice water

jar with a lid

1. Pour the ice water into the jar. Put the lid on the jar.
2. Place the jar in a warm spot, such as under a lamp. Wait a few minutes.
3. Observe the jar. What happened?

Children should note that water has condensed on the outside of the jar.

4. Infer where the water on the outside of the jar came from. Possible answer: The water did not come from the jar because the lid is on. So the water must have condensed from the air.
