Investigate Log

Independent Inquiry

To infer, use what you already know to figure out something.

Materials

Here are some materials you might use.
Draw other materials you may need.

paper towels

spray bottle

1. Spray two paper towels with water. Put one towel in a bright, warm place. Put the other towel in a cool, dark place.
2. Wait a little while. Observe the towels. What happened?

Possible answer: The towel in the bright place dried out. The towel in the dark place did not.

3. Think about how the towels are like your skin and body. Infer what can happen in the hot sun. Then tell why you should drink a lot of water in summer.

Possible answer: The sun can make my skin and body hot and dry. Drinking water will help my body stay cool.
