# Look at This!

**Materials**

forceps,
hand lens

**Other Materials**

penny, other small objects such as a toothpick or string

## What to Do

- Use the forceps to gently pick up one of the objects. Hold it at eye level and observe it closely. Then use the hand lens to observe it.
- Use words and simple pictures to record your observations. Repeat for the other objects.

## Inquiry Check

What else might you observe in this way?

Any objects that are small enough could be observed this way.

---

**Inquiry Skill** Observe

**Nature of Science**
Tools can be used to enhance observations.
