Name _____ **Date** _____

Lesson Review, Page 291
Answer Key

1. Children should give clear examples of tools scientists use to measure weather.
2. Water that falls from the sky is precipitation. The precipitation in this picture is snow.
3. Measuring weather helps scientists see patterns. Patterns help them predict the weather.
4. Measuring the weather helps people predict what the weather may be like from day to day. It helps to know what clothing to wear.
5. Scientists use tools like a thermometer, weather vane, anemometer, and rain gauge to learn about weather.
