Name: _____ Date: _____

Lesson Review, page 525
Answer Key

1. Children should give causes for each effect.
2. The adults are pushing one swing to make it go forward and pulling the other to make it go backward.
3. A rough surface causes more friction than a smooth surface does when it rubs against the skates.
4. In this lesson I learned about forces and motion. Gravity is an object's pull to Earth and friction slows things down. Levers and inclined planes help make it easier to move things.
5. B, gravity
