Science 5, Chapter 7
Questions, page 269
Answer Key

1. Students should give clear examples of mineral properties.
2. Possible answers should include definitions and examples of *streak*, *luster*, and *hardness*.
3. Answers may include streak, luster, and special properties but should not include color.
4. Possible answer: Quartz is a mineral that has a white streak. Quartz's luster is glassy, and its hardness is 7 on the Mohs hardness scale.
5. *Luster* describes the way that a mineral's surface reflects light.
6. B, hardness
