

Count On Pond Stories

Write an addition sentence to solve.
Count on to add.

1. 4 frogs sit on a lily pad.
2 frogs join them.
How many frogs
are there now?

$$\underline{4} + \underline{2} = \underline{6}$$

2. There are 6 green ducks.
There is 1 brown duck.
How many ducks
are there in all?

$$\underline{\quad} + \underline{\quad} = \underline{\quad}$$

3. 7 fish swim in a pond.
2 fish join them.
How many fish
are there in all?

$$\underline{\quad} + \underline{\quad} = \underline{\quad}$$

4. There are 8 red snakes.
There is 1 green snake.
How many snakes are
there altogether?

$$\underline{\quad} + \underline{\quad} = \underline{\quad}$$

5. There are 9 white birds.
There are 2 red
birds. How many
birds are there now?

$$\underline{\quad} + \underline{\quad} = \underline{\quad}$$

Change 1 to 2 in Exercise 4. Write the new number sentence. How are the problems the same and different? Explain.
